

**Product Name:** L-NIO dihydrochloride

**Catalog No.:** 0546

**Batch No.:** 10

CAS Number: 159190-44-0

IUPAC Name: *N*<sup>5</sup>-(1-Iminoethyl)-L-ornithine dihydrochloride

**1. PHYSICAL AND CHEMICAL PROPERTIES**

**Batch Molecular Formula:** C<sub>7</sub>H<sub>15</sub>N<sub>3</sub>O<sub>2</sub>·2HCl·¼H<sub>2</sub>O

**Batch Molecular Weight:** 250.63

**Physical Appearance:** Off White solid

**Solubility:** water to 100 mM

**Storage:** Desiccate at -20°C

**Batch Molecular Structure:**

**2. ANALYTICAL DATA**

**TLC:** R<sub>f</sub> = 0.2 (tert-Butanol/Acetonitrile/Toluene/Acetic acid/Wate)

**<sup>1</sup>H NMR:** Consistent with structure

**Optical Rotation:** [α]<sub>D</sub> = +19.4 (Concentration = 5.57, Solvent = Methanol)

**Microanalysis:**

	Carbon	Hydrogen	Nitrogen
Theoretical	34.05	7.01	15.47
Found	34.43	6.9	15.77

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

**Product Name:** L-NIO dihydrochloride

**Catalog No.:** 0546

**Batch No.:** 10

CAS Number: 159190-44-0

IUPAC Name: N<sup>5</sup>-(1-Iminoethyl)-L-ornithine dihydrochloride

**Description:**

Inhibitor of nitric oxide (NO) synthase. Inhibits iNOS, eNOS and nNOS. Active in vivo.

**Physical and Chemical Properties:**

Batch Molecular Formula: C<sub>7</sub>H<sub>15</sub>N<sub>3</sub>O<sub>2</sub>·2HCl·¼H<sub>2</sub>O

Batch Molecular Weight: 250.63

Physical Appearance: Off White solid

**Batch Molecular Structure:**

**Storage:** Desiccate at -20°C. This product is packaged under an inert atmosphere.

**Solubility & Usage Info:**

water to 100 mM

CAUTION - This product is extremely hygroscopic and we recommend that it is desiccated upon arrival. Solutions should be made up as soon as the vial is opened. This product is supplied as a lyophilized solid and may appear as a colourless film in the vial. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

**Stability and Solubility Advice:**

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

**SOLIDS:** Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

**SOLUTIONS:** We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
