Description:

Potent dopamine receptor antagonist (K_i values are 0.2 nM and 0.3 nM at D_1 and D_5 receptor sub-types, respectively). Also an agonist at 5-HT_{2C} receptors in vitro (K_i values are 6.3 - 9.3 nM). Blocks quinpirole-induced K_{ir3} (GIRK) currents (EC_{50} = 268 nM) independently of receptors.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
