Product Name: Neurokinin B (human, porcine)

Catalog No.: 1582

Batch No.: 11

CAS Number: 86933-75-7

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₅₅H₇₉N₁₃O₁₄S₂
Batch Molecular Weight: 1210.43
Physical Appearance: White lyophilised solid
Counter Ion: TFA
Solubility: Soluble to 1 mg/ml in DMSO
Storage: Store at -20°C
Peptide Sequence: Asp-Met-His-Asp-Phe-Phe-Val-Gly-Leu-Met-NH₂

2. ANALYTICAL DATA

HPLC: Shows 98.3% purity
Mass Spectrum: Consistent with structure

3. AMINO ACID ANALYSIS DATA

Amino Acid		Theoretical	Actual	Amino Acid		Theoretical	Actual
Ala				Lys			
Arg				Met	2.00		1.92
Asx	2.00		2.08	Phe	2.00		2.00
Cys				Pro			
Glx				Ser			
Gly	1.00		1.01	Thr			
His	1.00		1.02	Trp			
Ile				Tyr			
Leu	1.00		0.99	Val	1.00		0.98

Product Name: Neurokinin B (human, porcine)**Catalog No.:** 1582**Batch No.:** 11

CAS Number: 86933-75-7

Description:

Neurokinin B (human, porcine) is an endogenous tachykinin agonist peptide that shows preference for the NK₃ receptor (EC₅₀ = 1 nM).

Physical and Chemical Properties:Batch Molecular Formula: C₅₅H₇₉N₁₃O₁₄S₂

Batch Molecular Weight: 1210.43

Physical Appearance: White lyophilised solid

Peptide Sequence:Asp-Met-His-Asp-Phe-Phe-Val-Gly-Leu-Met-NH₂**Storage:** Store at -20°C**Solubility & Usage Info:**

Soluble to 1 mg/ml in DMSO

This product is supplied in lyophilized form. It may appear as a solid, gel or film and be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved. We recommend that solutions in DMSO are freshly prepared and used on the same day.

Counter Ion: TFA**Stability and Solubility Advice:**

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such as Cys, Met, Trp, Asn, Gln, and N-terminal Glu.

Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.

Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 µm filter to remove potential bacterial contamination whenever possible.
