

Certificate of Analysis

www.tocris.com

Product Name: pep2-EVKI
CAS Number: 1315378-67-6

Catalog No.: 1599 **Batch No.:** 1

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₆₂H₉₅N₁₃O₁₉
Batch Molecular Weight: 1326.51
Physical Appearance: White lyophilised solid
Net Peptide Content: 80%
Solubility: Soluble to 1 mg/ml in PBS (pH6.8)
Storage: Desiccate at -20°C
Peptide Sequence: Tyr-Asn-Val-Tyr-Gly-Ile-Glu-Glu-Val-Lys-Ile

2. ANALYTICAL DATA

HPLC: Shows >95% purity

3. AMINO ACID ANALYSIS DATA

Amino Acid		Theoretical	Actual	Amino Acid		Theoretical	Actual
Ala				Lys	1.00	1.07	
Arg				Met			
Asx	1.00	1.07		Phe			
Cys				Pro			
Glx	2.00	2.16		Ser			
Gly	1.00	1.08		Thr			
His				Trp			
Ile	2.00	2.07		Tyr	2.00	2.16	
Leu				Val	2.00	1.97

Product Name: pep2-EVKI

Catalog No.: 1599

Batch No.: 1

CAS Number: 1315378-67-6

Description:

Inhibitor peptide that selectively disrupts binding of the AMPA receptor subunit GluA2 (at the C-terminal PDZ site) to protein interacting with C kinase (PICK1). Does not affect binding of GluA2 to GRIP or ABP and does not increase AMPA current amplitude or affect long term depression (LTD).

Physical and Chemical Properties:

Batch Molecular Formula: C₆₂H₉₅N₁₃O₁₉

Batch Molecular Weight: 1326.51

Physical Appearance: White lyophilised solid

Peptide Sequence:

Tyr-Asn-Val-Tyr-Gly-Ile-Glu-Glu-Val-Lys-Ile

Storage: Desiccate at -20°C

Solubility & Usage Info:

Soluble to 1 mg/ml in PBS (pH6.8)

This product is supplied as a lyophilized solid and may be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

Net Peptide Content: 80% (Remaining weight made up of counterions and residual water).

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such as Cys, Met, Trp, Asn, Gln, and N-terminal Glu.

Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.

Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 µm filter to remove potential bacterial contamination whenever possible.
