Product Name:	Neuropeptide AF (human)
CAS Number:	192387-38-5

TOCRIS a biotechne brand

Catalog No.: 1928

Batch No.: 2

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula:	$C_{90}H_{132}N_{26}O_{25}$
Batch Molecular Weight:	1978.19
Physical Appearance:	White lyophilised solid
Net Peptide Content:	84%
Solubility:	Soluble to 1 mg/ml in water
Storage:	Desiccate at -20°C
Peptide Sequence:	Ala-Gly-Glu-Gly-Leu-Asn-Ser-Gln-Phe-Trp- Ser-Leu-Ala-Ala-Pro-Gln-Arg-Phe-NH ₂
ANALYTICAL DATA	
HPLC:	Shows >95% purity
	Batch Molecular Formula: Batch Molecular Weight: Physical Appearance: Net Peptide Content: Solubility: Storage: Peptide Sequence: ANALYTICAL DATA HPLC:

Consistent with structure

Mass Spectrum:

3. AMINO ACID ANALYSIS DATA

Amino Acid Theoretical Actual Amino Acid Theoretical Actual

Product Name: Neuropeptide AF (human)

CAS Number: 192387-38-5

Catalog No.: 1928

Batch No.: 2

Description:

Endogenous antiopioid neuropeptide and agonist at NPFF₁ and NPFF₂ receptors. Implicated in pain modulation and endocrine functions. May also regulate metabolism via stimulation of β -adrenoceptor expression in adipocytes. Also MRGPRA agonist

Physical and Chemical Properties:

Batch Molecular Formula: C₉₀H₁₃₂N₂₆O₂₅ Batch Molecular Weight: 1978.19 Physical Appearance: White Iyophilised solid

Peptide Sequence:

Ala-Gly-Glu-Gly-Leu-Asn-Ser-Gln-Phe-Trp-Ser-Leu-Ala-Ala-Pro-Gln-Arg-Phe-NH₂

Storage: Desiccate at -20°C

Solubility & Usage Info:

Soluble to 1 mg/ml in water

This product is supplied as a lyophilized solid and may be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

Net Peptide Content: 84% (Remaining weight made up of counterions and residual water).

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a $45-60^{\circ}C$ water bath).

Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such Cys, Met,Trp, Asn, Gln, and N-terminal Glu.

Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.

Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 μ m filter to remove potential bacterial contamination whenever possible.
