

Product Name: R18
CAS Number: 211364-78-2

Catalog No.: 2144 **Batch No.:** 2

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₁₀₁H₁₅₇N₂₇O₂₉S₃
Batch Molecular Weight: 2309.69
Physical Appearance: White lyophilised solid
Net Peptide Content: 76%
Counter Ion: TFA
Solubility: Soluble to 1 mg/ml in water
Storage: Store at -20°C
Peptide Sequence: Pro-His-Cys-Val-Pro-Arg-Asp-Leu-Ser-Trp-Leu-Asp-Leu-Glu-Ala-Asn-Met-Cys-Leu-Pro

2. ANALYTICAL DATA

HPLC: Shows 97% purity
Mass Spectrum: Consistent with structure

3. AMINO ACID ANALYSIS DATA

Amino Acid		Theoretical	Actual	Amino Acid		Theoretical	Actual
Ala	1.00	1.00	Lys				
Arg	1.00	1.06	Met	1.00	1.03		
Asx	3.00	3.03	Phe				
Cys			Pro	3.00	2.93		
Glx	1.00	1.00	Ser	1.00	0.99		
Gly			Thr				
His	1.00	1.01	Trp				
Ile			Tyr				
Leu	4.00	3.83	Val	1.00	1.05		

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

Product Name: R18
CAS Number: 211364-78-2**Catalog No.:** 2144 **2****Description:**

R18 is an antagonist of 14.3.3 proteins ($K_D \approx 80$ nM). Competitively inhibits 14.3.3-ligand interactions without requiring phosphorylation. Blocks the ability of 14.3.3 to bind to target proteins such as Raf-1, Bad, ASK1 and exoenzyme S.

Physical and Chemical Properties:

Batch Molecular Formula: $C_{101}H_{157}N_{27}O_{29}S_3$
Batch Molecular Weight: 2309.69
Physical Appearance: White lyophilised solid

Peptide Sequence:

Pro-His-Cys-Val-Pro-Arg-Asp-Leu-Ser-Trp-
Leu-Asp-Leu-Glu-Ala-Asn-Met-Cys-Leu-Pro

Storage: Store at -20°C**Solubility & Usage Info:**

Soluble to 1 mg/ml in water
This peptide is soluble to 1mM in 67% Acetic Acid (0.5mg/200µl), alternatively dissolve the peptide in a basic solvent such as a weak ammonia solution or water adjusted to a more basic pH (e.g pH 8-9) This product is supplied in lyophilized form. It may appear as a solid, gel or film and be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

Net Peptide Content: 76% (Remaining weight made up of counterions and residual water).**Counter Ion:** TFA**Stability and Solubility Advice:**

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such as Cys, Met, Trp, Asn, Gln, and N-terminal Glu.

Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.

Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 µm filter to remove potential bacterial contamination whenever possible.
