Product Name: Melanotan II  
Catalog No.: 2566  
Batch No.: 6

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₅₀H₆₉N₁₅O₉  
Batch Molecular Weight: 1024.19  
Physical Appearance: White lyophilised solid  
Net Peptide Content: 75.5%  
Counter Ion: Acetate  
Solubility: Soluble to 0.70 mg/ml in water  
Storage: Desiccate at -20°C  
Peptide Sequence: Ac-Nle-cyclo-(β-Asp-His-D-Phe-Arg-Trp-ε-Lys)-NH₂

2. ANALYTICAL DATA

HPLC: Shows 99.2% purity  
Mass Spectrum: Consistent with structure

3. AMINO ACID ANALYSIS DATA

Product Name: Melanotan II

CAS Number: 121062-08-6

Description:
High affinity melanocortin receptor agonist (K values are 0.67, 6.6, 34 and 46 nM for MC1, MC4, MC3 and MC5 receptors respectively). Stimulates erectile activity, inhibits food intake and displays neuroprotective properties in vivo.

Physical and Chemical Properties:
Batch Molecular Formula: C_{68}H_{104}N_{13}O_{9}
Batch Molecular Weight: 1024.19
Physical Appearance: White lyophilised solid

Peptide Sequence:
Ac-Nle-cyclo-(β-Asp-His-D-Phe-Arg-Trp-ε-Lys)-NH₂

Storage: Desiccate at -20°C

Solubility & Usage Info:
Soluble to 0.70 mg/ml in water
This product is supplied as a lyophilized solid and may be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

Net Peptide Content: 75.5% (Remaining weight made up of counterions and residual water).

Counter Ion: Acetate

Stability and Solubility Advice:
Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).
Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such Cys, Met, Trp, Asn, Gln, and N-terminal Glu.
Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.

Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 μm filter to remove potential bacterial contamination whenever possible.
