

Certificate of Analysis

www.tocris.com

Product Name: Brain natriuretic peptide (1-32) (human)

Catalog No.: 3522

Batch No.: 4

CAS Number: 124584-08-3

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₁₄₃H₂₄₄N₅₀O₄₂S₄
Batch Molecular Weight: 3464.05
Physical Appearance: White lyophilised solid
Net Peptide Content: 99%
Counter Ion: Acetate
Solubility: Soluble to 0.10 mg/ml in water
Storage: Store at -20°C
Peptide Sequence:

Ser-Pro-Lys-Met-Val-Gln-Gly-Ser-Gly-Cys-
Phe-Gly-Arg-Lys-Met-Asp-Arg-Ile-Ser-Ser-
Ser-Ser-Gly-Leu-Gly-Cys-Lys-Val-Leu-Arg-
Arg-His

2. ANALYTICAL DATA

HPLC: Shows >95% purity

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

Product Name: Brain natriuretic peptide (1-32) (human)

Catalog No.: 3522

Batch No.: 4

CAS Number: 124584-08-3

Description:

Brain natriuretic peptide (1-32) (human) is an endogenous peptide secreted from cardiac ventricles in response to volume increase and pressure overload that acts as an agonist at atrial natriuretic peptide (ANP) receptor A (NRP1). Decreases de novo collagen synthesis and increases MMP gene expression in vitro. Exhibits natriuretic, vasodilatory and lusitropic activity and inhibits the sympathetic and renin-angiotensin-aldosterone systems in vivo.

Physical and Chemical Properties:

Batch Molecular Formula: C₁₄₃H₂₄₄N₅₀O₄₂S₄

Batch Molecular Weight: 3464.05

Physical Appearance: White lyophilised solid

Peptide Sequence:

Ser-Pro-Lys-Met-Val-Gln-Gly-Ser-Gly-Cys-
Phe-Gly-Arg-Lys-Met-Asp-Arg-Ile-Ser-Ser-

Ser-Ser-Gly-Leu-Gly-Cys-Lys-Val-Leu-Arg-
Arg-His

Storage: Store at -20°C

Solubility & Usage Info:

Soluble to 0.10 mg/ml in water

This product is supplied as a lyophilized solid and may be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

Net Peptide Content: 99% (Remaining weight made up of counterions and residual water).

Counter Ion: Acetate

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such as Cys, Met, Trp, Asn, Gln, and N-terminal Glu.

Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.

Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 µm filter to remove potential bacterial contamination whenever possible.
