

Product Name: CHR 2797

Catalog No.: 3595

Batch No.: 4

CAS Number: 238750-77-1

IUPAC Name: α -[[[(2R)-2-[(1S)-1-Hydroxy-2-(hydroxyamino)-2-oxoethyl]-4-methyl-1-oxopentyl]amino]-benzeneacetic acid cyclopentyl ester

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₂₁H₃₀N₂O₆
Batch Molecular Weight: 406.48
Physical Appearance: White solid
Solubility: DMSO to 100 mM
 ethanol to 50 mM
Storage: Store at -20°C
Batch Molecular Structure:

2. ANALYTICAL DATA

TLC: R_f = 0.55 (Dichloromethane:Methanol [85:15])
HPLC: Shows >99.4% purity
¹H NMR: Consistent with structure
Mass Spectrum: Consistent with structure
Optical Rotation: [α]_D = +25.8 (Concentration = 0.5, Solvent = Methanol)
Microanalysis:

	Carbon	Hydrogen	Nitrogen
Theoretical	62.05	7.44	6.89
Found	61.91	7.74	6.92

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

Product Name: CHR 2797

Catalog No.: 3595

Batch No.: 4

CAS Number: 238750-77-1

IUPAC Name: α -[[[(2R)-2-[(1S)-1-Hydroxy-2-(hydroxyamino)-2-oxoethyl]-4-methyl-1-oxopentyl]amino]-benzeneacetic acid cyclopentyl ester

Description:

Amino peptidase inhibitor (IC₅₀ values are 100, 150, 220, > 1000, > 5000, > 10000 and > 30000 nM for LAP, PuSA, aminopeptidase N, aminopeptidase B, PILSAP, LTA₄ hydrolase and MetAP2, respectively). Potently inhibits tumor cell proliferation in a variety of tumor cell lines in vitro and in vivo. Also inhibits neprilysin (IC₅₀ = 900 nM). Exhibits antinociceptive activity and enhances the efficacy of Morphine (Cat. No. 5158) in the hot-plate and tail-flick assays, via an action on the peripheral nervous system.

Physical and Chemical Properties:

Batch Molecular Formula: C₂₁H₃₀N₂O₆

Batch Molecular Weight: 406.48

Physical Appearance: White solid

Minimum Purity: >98%

Batch Molecular Structure:

Storage: Store at -20°C

Solubility & Usage Info:

DMSO to 100 mM

ethanol to 50 mM

When purchased as a 1mg unit, this product is supplied as a lyophilized solid and may be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
