Product Name: MCH (human, mouse, rat)

Catalog No.: 3806

Batch No.: 10

CAS Number: 128315-56-0

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₁₀₅H₁₆₀N₃₀O₂₆S₄
Batch Molecular Weight: 2386.84
Physical Appearance: White lyophilised solid
Counter Ion: Trifluoroacetate
Solubility: Soluble to 1 mg/ml in water
Storage: Store at -20°C
Peptide Sequence:

Asp-Phe-Asp-Met-Leu-Arg-Cys-Met-Leu-Gly-
 Arg-Val-Tyr-Arg-Pro-Cys-Trp-Gln-Val

2. ANALYTICAL DATA

HPLC: Shows 95.0% purity
Mass Spectrum: Consistent with structure

3. AMINO ACID ANALYSIS DATA

Amino Acid Theoretical			Actual			Amino Acid Theoretical			Actual		
Ala						Lys					
Arg	3.00	2.91	Met	2.00	1.74						
Asx	2.00	2.03	Phe	1.00	0.99						
Cys	2.00	1.03	Pro	1.00	1.00						
Glx	1.00	1.01	Ser								
Gly	1.00	1.01	Thr								
His			Trp	1.00	0.16						
Ile			Tyr	1.00	0.96						
Leu	2.00	2.00	Val	2.00	2.08

Product Name: MCH (human, mouse, rat)

Catalog No.: 3806

Batch No.: 10

CAS Number: 128315-56-0

Description:

MCH (human, mouse, rat) is a potent endogenous agonist at melanin-concentration hormone (MCH) receptors (IC_{50} values are 0.3 and 1.5 nM and EC_{50} values are 3.9 and 0.1 nM at MCH₁ and MCH₂ receptors respectively). Increases food intake in vivo.

Physical and Chemical Properties:

Batch Molecular Formula: C₁₀₅H₁₆₀N₃₀O₂₆S₄

Batch Molecular Weight: 2386.84

Physical Appearance: White lyophilised solid

Peptide Sequence:

Asp-Phe-Asp-Met-Leu-Arg-Cys-Met-Leu-Gly-

Arg-Val-Tyr-Arg-Pro-Cys-Trp-Gln-Val

Storage: Store at -20°C

Solubility & Usage Info:

Soluble to 1 mg/ml in water

This product is supplied in lyophilized form. It may appear as a solid, gel or film and be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

Counter Ion: Trifluoroacetate

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such as Cys, Met, Trp, Asn, Gln, and N-terminal Glu.

Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.

Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 µm filter to remove potential bacterial contamination whenever possible.
