

**Product Name:** Kisspeptin 234

**Catalog No.:** 3881

**Batch No.:** 6

CAS Number: 1145998-81-7

**1. PHYSICAL AND CHEMICAL PROPERTIES**

**Batch Molecular Formula:** C<sub>63</sub>H<sub>78</sub>N<sub>18</sub>O<sub>13</sub>  
**Batch Molecular Weight:** 1295.42  
**Physical Appearance:** White lyophilised solid  
**Net Peptide Content:** 88%  
**Counter Ion:** TFA  
**Solubility:** Soluble to 1 mg/ml in water  
**Storage:** Store at -20°C  
**Peptide Sequence:** Ac-D-Ala-Asn-Trp-Asn-Gly-Phe-Gly-D-Trp-Arg-Phe-NH<sub>2</sub>

**2. ANALYTICAL DATA**

**HPLC:** Shows 97.1% purity  
**Mass Spectrum:** Consistent with structure

**3. AMINO ACID ANALYSIS DATA**

Amino Acid		Theoretical	Actual	Amino Acid		Theoretical	Actual
Ala		1.00	1.00	Lys			
Arg		1.00	0.93	Met			
Asx		2.00	1.55	Phe	2.00	1.99	
Cys				Pro			
Glx				Ser			
Gly	2.00	2.02		Thr			
His				Trp	2.00	Detected	
Ile				Tyr			
Leu				Val			

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

**Product Name:** Kisspeptin 234**Catalog No.:** 3881**6**

CAS Number: 1145998-81-7

**Description:**

Kisspeptin 234 is a kisspeptin receptor (KISS1, GPR54) antagonist; kisspeptin-10 (Cat. No. 2570) analog. Inhibits kisspeptin-10 stimulation of inositol phosphate (IP) ( $IC_{50} = 7$  nM) and release of gonadotrophin-releasing hormone (GnRH).

**Physical and Chemical Properties:**Batch Molecular Formula:  $C_{63}H_{78}N_{18}O_{13}$ 

Batch Molecular Weight: 1295.42

Physical Appearance: White lyophilised solid

**Peptide Sequence:**

Ac-D-Ala-Asn-Trp-Asn-Gly-Phe-Gly-D-Trp-  
Arg-Phe-NH<sub>2</sub>

**Storage:** Store at -20°C**Solubility & Usage Info:**

Soluble to 1 mg/ml in water

This product is supplied in lyophilized form. It may appear as a solid, gel or film and be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

**Net Peptide Content:** 88% (Remaining weight made up of counterions and residual water).**Counter Ion:** TFA**Stability and Solubility Advice:**

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such as Cys, Met, Trp, Asn, Gln, and N-terminal Glu.

Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.

Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 µm filter to remove potential bacterial contamination whenever possible.
