Description:

Potent inhibitor of β -catenin-responsive transcription (CRT) (IC_{50} = 40.3 nM in assays of Wnt pathway activity). Thought to directly influence the interaction between β -catenin and TCF4. Induces marked G₀/G₁ cell cycle arrest in HCT-116 and HT29 cell lines.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
