

Product Name: Galloflavin

Catalog No.: 4795

Batch No.: 2

CAS Number: 1780260-20-9

IUPAC Name: 3,8,9,10-Tetrahydroxyprano[3,2-c][2]benzopyran-2,6-dione potassium salt

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₁₂H₅O₈K.2H₂O

Batch Molecular Weight: 352.29

Physical Appearance: Brown solid

Solubility: DMSO to 5 mM

Storage: Store at -20°C

Batch Molecular Structure:

2. ANALYTICAL DATA

HPLC: Shows 95.8% purity

¹H NMR: Consistent with structure

Mass Spectrum: Consistent with structure

Microanalysis:

	Carbon	Hydrogen	Nitrogen
Theoretical	40.91	2.57	
Found	40.74	2.69	

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

Product Name: Galloflavin

Catalog No.: 4795

Batch No.: 2

CAS Number: 1780260-20-9

IUPAC Name: 3,8,9,10-Tetrahydroxyprano[3,2-c][2]benzopyran-2,6-dione potassium salt

Description:

Galloflavin is an inhibitor of human lactate dehydrogenase (LDH) (K_i values are 5.46 and 15.1 μ M for LDH-A and LDH-B, respectively, in competition with pyruvate). Inhibits lactate production and decreases ATP synthesis in PLD/PRF/5 cells; thought to decrease cell viability via impairment of aerobic glycolysis.

Physical and Chemical Properties:

Batch Molecular Formula: $C_{12}H_5O_8K \cdot 2H_2O$

Batch Molecular Weight: 352.29

Physical Appearance: Brown solid

Minimum Purity: $\geq 95\%$

Batch Molecular Structure:

Storage: Store at -20°C

CAUTION - This product is light sensitive and we recommend that the solid material and any solutions obtained are protected from exposure to light.

Solubility & Usage Info:

DMSO to 5 mM

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a $45\text{-}60^\circ\text{C}$ water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. *Unless contradicted by product-specific protocols or instructions, our standard recommendations apply:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
