Description:

PPTN hydrochloride is a PPTN is a high affinity and selective P2Y₁₄ antagonist (K_B = 434 pM), which exhibits >10,000-fold selectivity for P2Y₁₄ over other P2Y receptors. PPTN inhibits UDP-glucose and MRS 2690-induced porcine pancreatic artery contraction ex vivo, and also blocks UDP-glucose-induced chemotaxis of HL-60 leukemia cells in vitro.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
