Description:

Eact is a TMEM16A (ANO1) calcium-activated chloride channel (CaCC) activator ($EC_{50} = 3 \mu\text{M}$). Also transient receptor potential vanilloid 1 (TRPV1) channel activator ($EC_{50} = 11.6 \mu\text{M}$). Ca^{2+} -independent. Displays no effect on CFTR Cl^- or ENaC Na^+ conductance. Stimulates submucosal gland secretion in human bronchi.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a $45\text{-}60^\circ\text{C}$ water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
