Description:

Potent dual CRTH2 and prostaglandin D₂ (PGD₂) receptor antagonist (IC₅₀ values are 8 and 35 nM, respectively in plasma). Inhibits PGD₂-induced down modulation of CRTH2 on CD16⁺ granulocytes in human whole blood as well as PGD₂-induced cAMP response in platelets. Inhibits PGD₂-induced airway constriction in vivo. Also inhibits BRD4 (K_d = 170 nM). Orally bioavailable.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
