**Description:**

Potent and selective irreversible MAGL inhibitor (IC<sub>50</sub> values are 0.25 and 7.4 nM at rMAGL and hMAGL, respectively). Exhibits 389-fold selectivity over hFAAH and exhibits minimal binding at CB receptors (IC<sub>50</sub> > 10 μM). Alleviates symptoms in a MS in vivo model. Exhibits analgesic effects in an acute inflammatory pain model in vivo. Ameliorates neuropathic hypersensitivity induced by oxaliplatin (Cat. No. 2623). Displays high membrane permeability and brain penetrant.

**Stability and Solubility Advice:**

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

**SOLIDS:** Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

**SOLUTIONS:** We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
