Description:

LP 922056 is a notum pectinacetylerase inhibitor. LP 922056 activates wnt signaling in vitro (EC₅₀ values are 21 nM in human and 55 nM in mouse cell-based assay). It increases cortical bone thickness in mouse model of bone growth. LP 922056 also inhibits growth of Apc-mutant cell lines and proliferation of intestinal adenomas in vivo.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. *Unless contradicted by product-specific protocols or instructions, our standard recommendations apply:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
