Description:

MRK 740 is a potent PRDM9 histone methyltransferase inhibitor (IC_{50} = 85 nM for in vitro methylation of H3K4), which displays >100-fold selectivity over other histone methyltransferases. MRK 740 inhibits H3K4 methylation in cells (IC_{50} = 0.8 μ M).

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
