Description:

SNIPER(ER)-87 is a potent and selective estrogen receptor α (ER α) Degradar (Specific and Nongenetic IAP-dependent Protein Erasers or SNIPER) (DC₅₀ = 3 nM). SNIPER(ER)-87 comprises the IAP binding ligand LCL 161 (Cat .No. 7178) joined by a linker to the estrogen-binding moiety 4-hydroxytamoxifen (Cat. No. 3412). The product decreases ER α levels in breast cancer cells in vitro and in mouse ovaries in vivo. SNIPER(ER)-87 also reduces ER α levels and inhibits tumor proliferation in breast cancer xenograft mouse models. Please see product datasheet on www.tocris.com for full description.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
