Description:

Potent TANK-binding kinase 1 (TBK1) PROTAC® Degrader (DC_{50} = 12 nM, D_{max} = 96%). Exhibits >50-fold selectivity for TBK1 over the closely related IKKε. Comprises a ligand for von-Hippel Lindau (VHL) protein joined by a linker to a TBK1-targeting moiety. Brings about near complete degradation of TBK1 in mutant K-Ras and wild-type cancer cell lines with no significant effect of proliferation. Negative control TBK1 control PROTAC® 4 (Cat. No. 7260) also available. PROTAC® is a registered trademark of Arvinas Operations, Inc., and is used under license. Please see product datasheet on www.tocris.com for full description.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
