

Product Name: Di 4 ANEPPS

Catalog No.: 7324

Batch No.: 1

CAS Number: 90134-00-2

IUPAC Name: 6-[2-(*N,N*-Dibutylamino)naphthyl]ethenyl-4'-pyridinium propanesulfonate

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₂₈H₃₆N₂O₃S
Batch Molecular Weight: 480.67
Physical Appearance: Black solid
Solubility: DMSO to 10 mM
Storage: Store at -20°C
Batch Molecular Structure:

2. ANALYTICAL DATA

HPLC: Shows 99% purity at 254 nm
Mass Spectrum: Consistent with structure
UV Spectrum: Consistent with structure
 λ_{max} : 497 nm (MeOH)

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

Product Name: Di 4 ANEPPS

Catalog No.: 7324

Batch No.: 1

CAS Number: 90134-00-2

IUPAC Name: 6-[2-(*N,N*-Dibutylamino)naphthyl]ethenyl-4'-pyridinium propanesulfonate

Description:

Di 4 ANEPPS is a voltage-sensitive dye, also known as an electrochromic probe, which fluoresces in response to change in electrical potential across a cellular membrane. Di 4 ANEPPS fluoresces only when membrane bound; change in electrical potential causes an intramolecular charge transfer and blue-shift in the excitation spectra. Di 4 ANEPPS is commonly used to detect transient changes in membrane potential in excitable cells such as neurons and cardiac cells. Excitation ratio measurements can be used to determine membrane potential. In model phospholipid membranes Ex/Em maxima are 465/635 nm, however spectral properties are highly depend... Please see product specific page on www.tocris.com for full description.

Physical and Chemical Properties:

Batch Molecular Formula: C₂₈H₃₆N₂O₃S

Batch Molecular Weight: 480.67

Physical Appearance: Black solid

Minimum Purity: ≥90%

Batch Molecular Structure:

Storage: Store at -20°C

CAUTION - This product is light sensitive and we recommend that the solid material and any solutions obtained are protected from exposure to light.

Solubility & Usage Info:

DMSO to 10 mM

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use
