Description:

SJF 0628 is a potent, high affinity and mutant-selective Degradator (PROTAC®) of BRAF, comprising a ligand for the von Hippel Lindau E3 ligase joined by a piperazine linker to the BRAF kinase inhibitor vemurafenib. SJF 0628 induces degradation of all 3 classes of BRAF mutant in BRAF-dependent cancer cell without inducing degradation of the BRAF^{WT} protein. The product degrades mutant BRAF^{V600E} in BRAF-driven cancer cell lines (DC₅₀ = 6.8 nM - 28 nM). SJ 0628 inhibits phosphorylation of MEK and ERK in SK-MEL-28 cells (DC₅₀ = 10 nM) and inhibits cell growth in mutant-BRAF driven cancer cells (EC₅₀ = 37 nM). SJF 0661 negative control (Cat. ... Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
